

Mission Statement

With God's guidance we shall efficiently manage our Company to fulfill its obligations to our customers, shareholders, employees, contractors and the community at large, with an attitude of SERVICE and a commitment to TRUTH, FAIRNESS and the building of GOODWILL.

About Us

International Poultry Breeders has been producing the highest quality hatchings eggs since 1994. We have strived to produce an excellent quality product for our parent company, Jamaica Broilers Group, as well as our other local and international customers.

Our goal is to be a reliable, technically advanced, customer oriented supplier of fertile hatching eggs; adding value to our customers through continuous focus on health, genetics, storage, shipping and delivery.

Our Operations

Our management team works closely with the state veterinarians and Georgia Poultry Lab to improve their knowledge, and stay informed of the latest developments in our industry.

With farms located in two states, IPB is ideally positioned to supply a safe and superior product. We have invested to ensure your supply is secure.

Georgia

Our farms in Georgia are located in the South and North of the state. Bird health and the production of a high quality product motivated the team to invest in these two locations. Having birds in more than one location reduces our exposure to disease, weather risk, and suppliers' limitation.

Arkansas

Our farms in Arkansas bring added security to our customers as we continue to expand our production and reduce risk. Additionally, our Arkansas location is strategically located to take advantage of preferable feed ingredient prices and convenient logistics to Canada and the Midwest.
